

Driver Performer: Take Control of the wheel

Get a clearer picture of what is actually happening on the road and manage your operations more effectively with Driver Performer.

Driving For Results

Driver Performer is an innovative driver management solution that addresses the human component of your trucking operation in a cross-dimensional and user-friendly scorecard that's as easy as point and click! Through on-demand feedback, you can quickly isolate issues and proactively manage how your drivers are functioning along key performance indicators determined by your specific goals.

Understandable, On-Demand Feedback

Feedback is timely and specific and based on an intelligent scorecard of meaningful data you and your drivers can quickly act upon to modify driving habits based on preset parameters. The TPI dashboard consolidates *more* real-time information, flowing from *more* sources, in one place, than any other tool currently available on the road! This allows you to see all critical components at a high level and the flexibility to drill down and manage specific key indicators such as CSA compliance, safety and risk, on-time service, payroll information, and warning flags for retention issues.

More Performance

Find out where you are operating well and where you can improve. Driver Performer takes into account all relevant driver and vehicle factors including: safety records and risk assessments, on-time and hours of service, productivity, labor costs, fuel utilization, speed, out-of-route miles, idle time, and more.

The Most Gain

Focus on those drivers that will provide the most improvement to your bottom line. TPI doesn't just deliver more details, but more results by helping you track and manage your driver data so you can develop more effective performance benchmarks as a means to improve profitability. Driver Performer also offers the structure to create, implement, and track a manager's performance program for improvement and reward.

Bottom Line Impact

Driver Performer can help you make better decisions, on road and off. Retain the "best of the best drivers", improve fuel efficiencies, reduce insurance costs, improve asset utilization, enhance workflow, increase on-time service, and focus on

profitability – all with one program! Driver Performer promises a quick start up with no additional hardware costs or head count. Even better, most upgrade improvements are FREE.

Drive Retention

Driver Performer peer grouping retention methodology contains a robust Driver Retention Alert system created to develop Driver Profiles that are more meaningful to each driver and can result in more productive performance evaluations. In addition, critical event technology from all sources were added to the Compliance and Safety Risk toolbox in an effort to automate reviews, workflow and follow ups based on productivity, risk assessment, pay-for-performance, reporting and more!

Increase Your Profitability!

Timely information and management of your driver's performance is the key to making every element of your business as productive as possible. Contact us at 1-866-771-5003 or visit www.truckscore.com to learn more about how you can drive results and save money with Driver Performer.

About Transportation Performance, Inc. (TPI)

Better data and better decisions – it's what drives us! TPI is a provider of original software solutions and expert consulting services in the truckload industry.
